

# Blobecoin

**Blobepaper version 0.0.1**

**Contract address:** `0x58845D713d37cb867450507f63b59Fe6Bea16F2C`

## Introduction

*"It's all about the money"*

*- Jessie J*

Blobecoin (/blɒbkɔɪn/) is the ugliest experiment in decentralized finance. The world of finance is done with crypto-puppies and crypto-cuteness. It is time for an alternative. It's time to use Blobecoin, the ugliest crypto, for ugly stuff.

## Problematic:

From the early ages of the Mesopotamian Shekel 5000 years ago to the birth of Dogecoin in 2013, no one can disagree that money has evolved in extreme and various forms. However, one big problem hasn't been properly solved.

How do you pay for something that you don't really want to but you have to? Stuff that almost feels unfair? How do you show your frustration and discontent to the recipient?

## Our philosophy:

Bills are ugly, Fines are ugly, Rent is ugly - certain expenses are just plain ugly. Why pay these ugly expenses with some cute crypto dog or unicorn? Sometimes spending money is ugly but there is no real way to show how ugly, until now.

## Here comes the ugliness: the blobfish

*"I'm ugly and I know it"*  
*1 of the 420 blobfish still alive.*

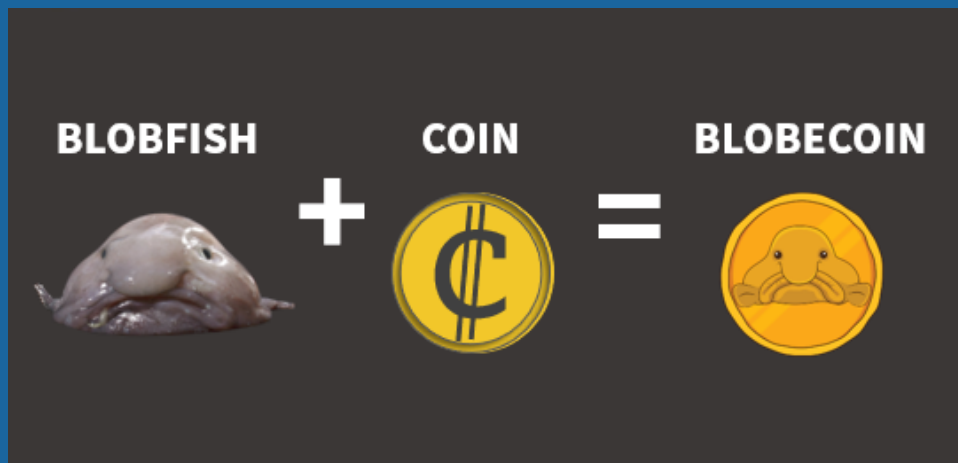

The blobfish was elected the ugliest animal in the world in an online poll that was run by the Ugly Animal Preservation Society. If you don't believe it, judge for yourself.

## Blobfish + Coin = Blobecoin

This formula is the  $E = mc^2$  in crypto.

A man called Sakana-san invented the Blobecoin by combining the ugliest animal, the blobfish, and cryptocurrency. What was the result of such a revolutionary experiment?

Our philosophy is to create an ugly cryptocurrency that shows the people's discontent when paying for ugly stuff. Paying ugly expenses with crypto puppies and kittens just doesn't strike the right chord, it simply doesn't do the job! But sending the ugly Blobecoin shows the recipient exactly what you think and how you feel. JUST BLOB IT!

### **Blobenomics:**

Blobecoin is a standard BEP-20 token running on the Binance Chain.

There are no hidden fees and complicated mechanisms.

Blobecoin defines itself as the ugliest community token.

### **Specifications:**

5 quadrillion tokens

18 decimals

Symbol: **BLOB**

### **Centralized vs Decentralized, Cute vs Ugly**

#### **The "Classic" Centralized Model**

In order to pay tax, rent or bills, the user first sends funds to a bank. Then the bank transfers the funds to the taxman, the landlord or the utility company - and to all the other ugly people and institutions squeezing you for every last penny.

In this scenario, the "lovely" bank is an intermediary, who you probably also pay for the pleasure of paying your ugly expenses. The bank has all the power.

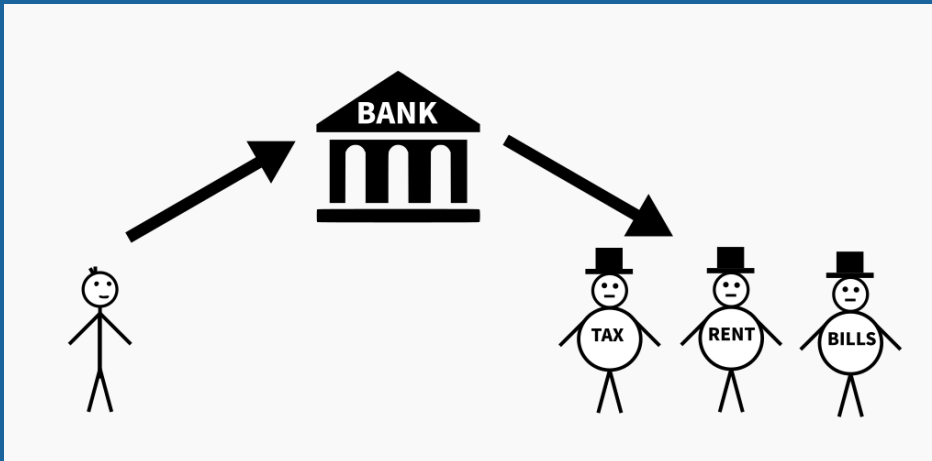

Figure 1: Centralized model - Current payment method

## The “Cute” Decentralized Model

Now, ugly expenses can be paid directly to the taxman, landlord and utility company by sending them cute dogs - cute, if you like paying ugly expenses.

At least, in this scenario, the bank no longer helps themselves to some of your hard earned pennies. But the recipients are very happy, they love cute dogs and will keep asking for more!

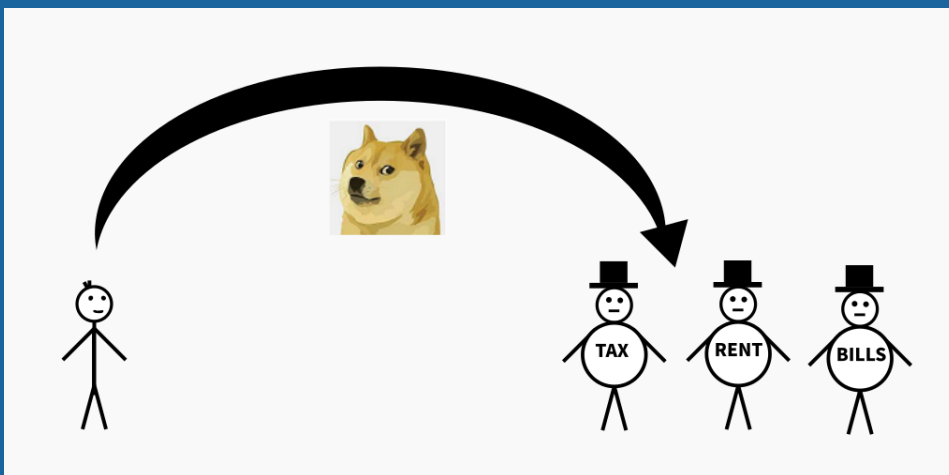

Figure 2: Decentralized and Cute

## The “UGLY” Decentralized Model

BLOB IT! No cuteness here - ugly stuff paid with ugly crypto - Blobecoin!

You have all the power.

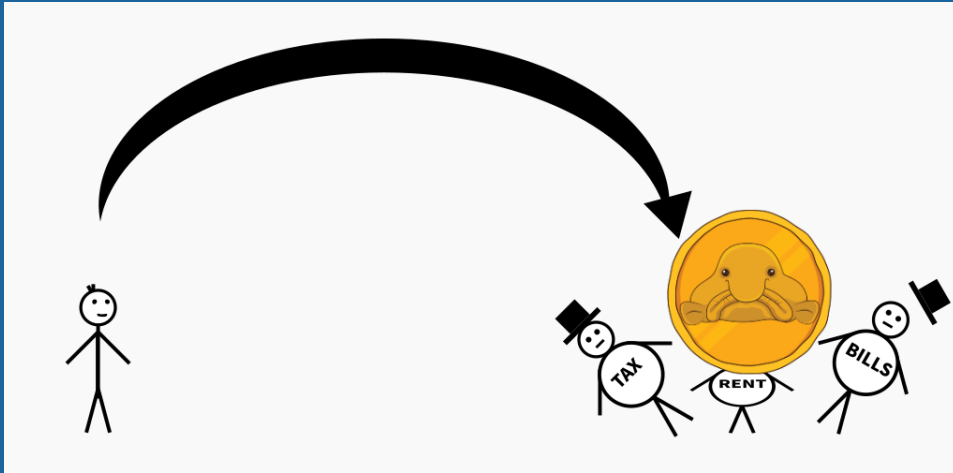

Figure 3: Decentralized and Ugly - The FUTURE of ugly stuff

## Timeline:

### Q1 2021: Research & Development

Blobecoin formula by Sakana-san  
Token Development in solidity  
Social media live

### Q2 2021: Launch

Blobecoin deployed on Pancake Swap [See TX on BscScan](#)  
All Liquidity Token burned [See TX on BscScan](#)  
2.5 Quadrillions Coins burned ( 50% supply ) [See TX on BscScan](#)  
Apply for CoinmarketCap and CoinGecko

### Q3 2021: Growth

Growth of the Blobecoin community  
Listing on multiple exchanges
